CORPORATE HIGHLIGHTS

WWW.VRR.CA

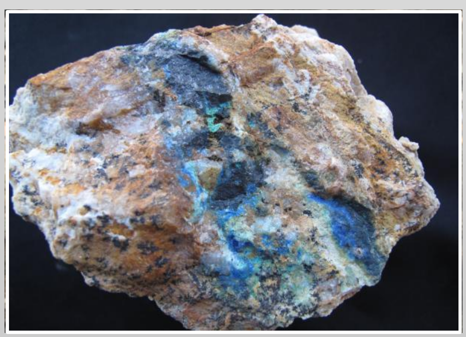
FRAMEWORK AND STRATEGY

- Ten years of continuous, active exploration by VR in Nevada from 2015-2024; approx. $10M spent.
  - VR has strong industry relationships in Nevada for expl. service work, claim admin', legal, env. and permitting.
- 100% owned subsidiary, Renntiger Resources USA, registered in good standing in Nevada since 2012.
- All properties owned 100% by VR, with no back-in rights, and no annual lease payments to vendors.
- First pass drilling started by VR on three core assets, based on state-of-the-art exploration surveys:
  Completion of follow-up drilling provides a **stand-alone and diversified strategy for 12-18 months**.
- **Follow-up drilling at New Boston provides near-term investment upside potential**; tungsten and moly' underscore the relevance to current US demand for domestic supply of strategic and critical metals.

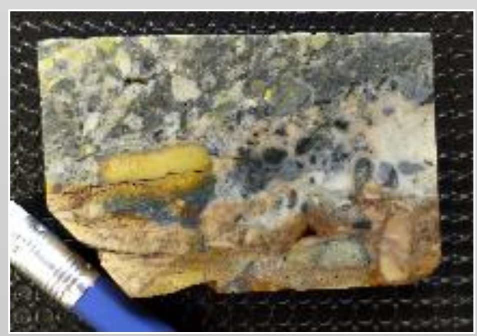
PROJECT HIGHLIGHTS, NEVADA

- **New Boston, NV (Mo-W-Cu-Ag)** – polymetallic porphyry-skarn system across 3-4 km strike of sheeted veins on surface; 4km from highway; drilling in 2024 on east side of system; follow-up drilling in summer 2026 at Jeep Mine on west side of system: NB26-003 intersects 317 m at 0.77% CuEq starting at surface, above 419 m of 0.48% CuEq in 2,892 ft drill hole of continuous polymetallic stockwork veining; **follow-up drilling planned, Fall/2026.**
- **Bonita Project, NV (Cu-Au)** – alkalic porphyry system in volcanic arc which hosts the Yerington porphyry copper camp; four years of continuous exploration by VR from 2015-2019, with copper-gold mineralization confirmed in drill holes 001 and 004 in 2018 at Copper Queen; 3D-array DCIP survey in **2026** for targeting for follow-up drilling.
- **Amsel Project, NV (Au-Ag)** – epithermal gold-silver in Walker Lane belt; 20km vein trend in Big Ten caldera; Round Mtn analogue nearby; continuous exploration by VR in 2017-2020; NI 43-101 recommended drilling started in 2020, with 62.5m @ 15.9 g/t Ag; follow-up drilling in southern structural block is warranted.

NEW BOSTON PROJECT, NV
Cretaceous Mo-W-Cu-Ag porphyry



BONITA PROJECT, NV
Jurassic Copper-Gold alkalic porphyry



AMSEL PROJECT, NV
Tertiary Epithermal Au-Ag in tuffisite breccia

Next Steps; Planned Programs

- Q2-3 2026	- Drill test Jeep Mine center within the **New Boston** porphyry; 2-3 holes for 1,500 m;	**$1 M**
	- Complete 3D-array DCIP survey at **Bonita** Cu-Au porphyry; no permit required;	**$200 k**
	- Consider re-submission of drill permit for **Amsel** epithermal gold-silver target.	
- Q3-4 2026	- Pending Jeep Mine results, follow-up delineation drill program at **New Boston** ;	4 – 6,000 m;
	- Consider drill test on Copper-Queen lithocap at **Bonita** based on DCIP survey;	1,500 m;
- 2026/2027	- Consider completion of first pass drilling of the epithermal Au-Ag system at **Amsel**.

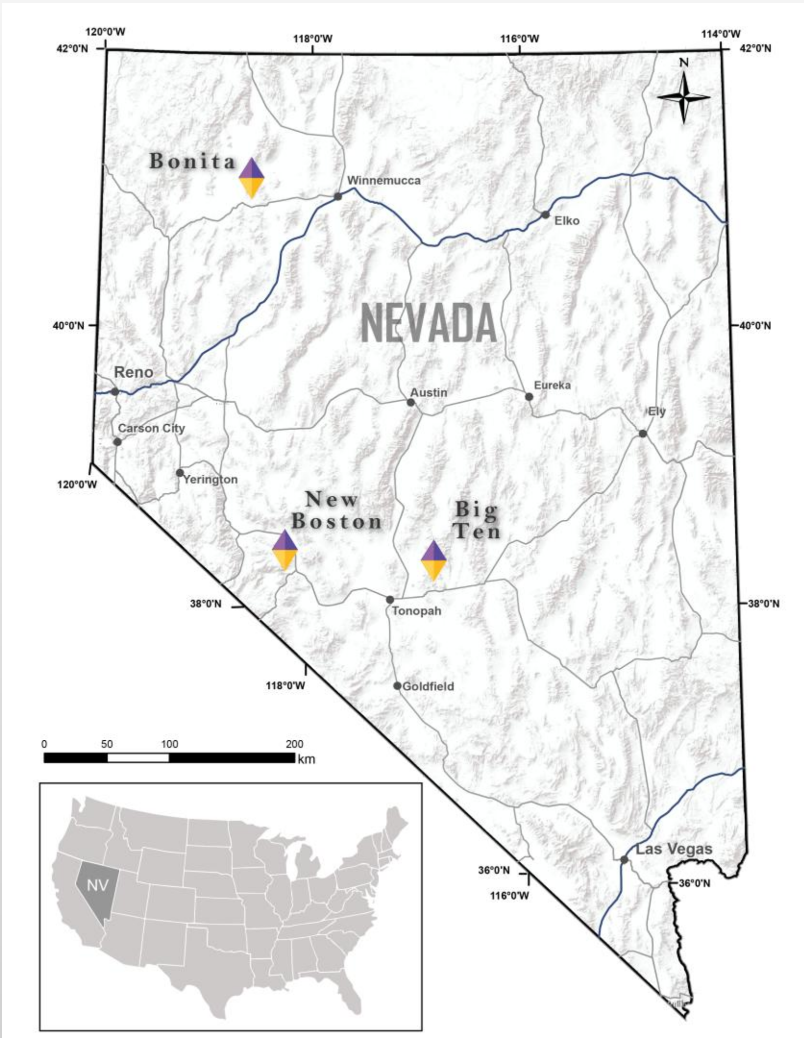
PROPERTY LOCATION MAP

WWW.VRR.CA



GOOD INFRASTRUCTURE FOR COST-EFFECTIVE EXPLORATION & DEVELOPMENT

- Easy access to properties in Nevada from the international airport at Reno;
- Road access to <u>and</u> through properties, with nearby towns for service hubs;
- Power and rail infrastructure;
- Temperate climate for year-round exploration.

S0LID OWNERSHIP; SOLID JURISDICTIONS

- Properties owned 100%, with no carried interests, to leverage upside potential for investors;
- Supportive regulatory environment with long history in mining = effective permitting;
- Nevada Properties outside of sage grouse protection areas.

<u>CONSOLIDATED SHARE STRUCTURE; **Sept. 17, 2026**</u>
- **61,039,179** shares issued and outstanding
- 35,265,637 Warrants and 2,982,500 Options
  99,287,316 fully diluted

Working Capital of approx. **$8.5 M**

MANAGEMENT & BOARD WITH A TRACK RECORD

The executive team has a strong track record for capturing shareholder value through discovery and M&A sales. Directors include:

Dr. Michael Gunning, CEO & Chairman: >30 years of industry experience: mapping & mineral deposit research with both provincial and federal Geological Surveys, exploration in the Americas with Teck Resources; **VR = current focus, 100%**; previously CEO of Hathor Expl. acquired by Rio Tinto for C$654m in 2012, and Exec. Chairman of Alpha Minerals acquired in 2013 for C$180m.

Craig Lindsay, Director: >20 years industry experience in corporate finance, investment banking and mineral exploration business development in North America and Asia; previously CEO of Magnum Uranium focused in Nevada and acquired by Energy Fuels Inc., and Otis Gold recently acquired by Excellon Resources in April, 2020.

Keith Inman, Director: Partner, Business Law group @ Pushor Mitchell LLP, focused on corporate/commercial and securities law.
